

The National Association of
Jewelry Appraisers
is pleased to present
international gemological products
difficult to obtain in the United States

NAJA has had positive experience with these products and authors and can, without hesitation, recommend them to the gemological community

OPL "Pocket" Diffraction Grating Spectroscope

Price: \$95.00, shipping & insurance extra

With fixed slit & fixed focus. This spectroscope has been used throughout the world for more than 35 years & is recognized and respected by gemologists & gemological teaching centers worldwide. It is an ideal instrument for a small gemological 'mini-lab' kit, or is easily carried in a pocket or briefcase.

Perfect for field use or general study purposes. Constructed of stainless steel & black acetol, 55mm long, 12.5mm wide, packed in a distinctive blue lined transparent plastic case. As shown in *A Students' Guide to Spectroscopy* by Colin Winter, FGA, DGA.

OPL "Teaching" Diffraction Grating Spectroscope

Price: \$150.00, shipping & insurance extra

OPL "Teaching" Diffraction Grating Spectroscope, with fixed slit & fixed focus. Similar to but larger than the "Pocket" model.

This spectroscope is ideal for laboratory or classroom use. Has been used worldwide for more than 20 years. Reviewed favorably in several international gemological journals. Constructed of stainless steel & black acetol, 104mm long, 25mm wide, packed in a distinctive blue plastic tube. Best used with the OPL Stand. Shown in *A Students' Guide to Spectroscopy* by Colin Winter, FGA, DGA.

OPL Spectroscope Stand

Price: \$125.00, shipping & insurance extra

OPL Spectroscope Stand, with rotating table, for the OPL "Teaching" Spectroscope. As illustrated & discussed in *A Students' Guide to Spectroscopy* by Colin Winter, FGA, DGA. Constructed of black coated mild steel & aluminum this sturdy stand with non-slip feet is an ideal accessory when demonstrating spectroscopy in a classroom situation, or for home study.

OPL Hylite Lamp

Price: \$350.00, shipping & insurance extra

OPL 'Hylite'. A quartz halogen lamp, for gemological use with a focused high intensity light beam, designed specifically for use with the OPL range of instruments. Extra bulb provided.

With a flexible swan-neck & rear aperture for transmitted light spectroscopy, allowing specimens to be placed directly on to the lamp head, as shown in *A Students' Guide to Spectroscopy* by Colin Winter, FGA, DGA. Flexible in all directions this lamp is ideal for use with all OPL instruments & is also suitable as a microscope lamp.

OPL Conical Discs, set of 3

Price: \$85.00. shipping & insurance extra

OPL Conical Discs, set of 3. 25mm diameter steel discs with a black solvent resistant coating. Apertures of 3.5mm, 5.5mm & 7.0mm. Prevents unwanted light leaking from around a specimen on a microscope stage. May be used with a suitable immersion liquid in a glass cell.

For use with microscope & spectroscope combination, as shown in *A Students' Guide to Spectroscopy* by Colin Winter, FGA, DGA.

A Students' Guide to Spectroscopy

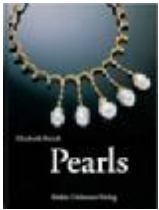

Price: \$30.00, shipping & insurance extra

A Students' Guide to Spectroscopy by Colin Winter, FGA, DGA, illustrated by Hilary Taylor, BA, FGA, DGA.

A student friendly approach to spectroscopy, with detailed descriptions, photos, diagrams, practical examples, advice and just a touch of theory. As reviewed by Michael O'Donoghue in the October 2003 issue of *The Journal of Gemmology*. This little book has taken the gemological world by storm and is now regarded as an essential part of a gemology student's library. 88 full color pages. Signed by the author & illustrator.

Pearls

Price: \$140.00, shipping & insurance extra

***Pearls* by Elisabeth Strack, FGA, GG**

Currently, the most comprehensive of all publications on the jewels of the ocean around the world. This book offers a fantastic insight into five millennia of the history of pearls. The 696 page work is currently the most exhaustive publication on the varied and breathtaking world of the ocean jewels. More than 650 graphics, tables, exquisite photographs and detailed maps document the history of pearls from their former standing as jewels for kings to their role as modern jewelry. Each important detail concerning the world of pearls is presented here in word and picture – ranging from the development and characteristics of natural and cultured pearls to the analysis and treatment methods. Bookplate signed by the author.

Gem and Ornamental Materials of Organic Origin

Price: \$65.95, shipping & insurance extra

"A Gem and Ornamental Materials of Organic Origin" by Maggie Campbell Pedersen, FGA, ABIPP

The only book devoted to organic material is an easily accessible and interesting reference book. It contains chapters on amber and copal, jet, ivories, bone, antler, horn, rhino horn, tortoiseshell, pearl, shell, coral and many unusual organics and plastics. A further chapter provides quick reference charts. Information is given on identification tests, uses, history and conservation status. Over 200 color photographs aid identification of the materials. Bookplate signed by the author.
